

SAI KIRAN BISWAL

Product Manager · Enterprise FinTech SaaS · O2C & AR Automation · Digital Banking
Hyderabad / Bengaluru · saikiranbiswal14@gmail.com · +91-8018136097 · linkedin.com/in/sai-kiran-biswal

PROFESSIONAL SUMMARY

Product Manager with ~5 years of experience building and delivering enterprise SaaS products across FinTech, digital banking, and CX domains, with an MBA from XIMB. Led product strategy and end-to-end delivery across Fortune 500 Order-to-Cash programs and Tier-1 banking transformation engagements spanning multiple markets, taking products from discovery through launch in complex, multi-stakeholder environments.

EDUCATION

MBA – Business Management

Xavier Institute of Management Bhubaneswar (XIMB)
2022–2024

B.Tech – Engineering

VSSUT Burla, Odisha
2014–2018

SKILLS & EXPERTISE

Product Management	Product Ownership · Roadmap Prioritization · PRD Authoring · Product Discovery · Backlog Refinement · Sprint Planning · Release Management
Domain	Order-to-Cash (O2C) · AR Automation · Collections Lifecycle · Digital Banking Channels · FinTech SaaS · ERP Integrations · STP Architecture · Workflow Automation
Platform	Configurable SaaS · Multi-tenant Platform Design · Multi-client Deployment · Workflow Orchestration · Platform Extensibility · State Management
Delivery	Agile / Scrum · CSPO® · Stakeholder Management · UAT Coordination · Cross-functional Execution · Change Management
Analytics & UX	Customer Journey Mapping · VoC · Journey Analytics · User Research · Jobs-to-be-Done
Tools	JIRA · Confluence · Azure DevOps · SQL · Power BI · Microsoft Office Suite

PROFESSIONAL EXPERIENCE

Product Consultant · Highradius	Jun 2025 – Present
- Owned product backlog across Fortune 500 programs, grooming backlogs, maintaining epics, user stories, and acceptance criteria across the full Order-to-Cash roadmap. - Authored PRDs and user stories for Collections Cloud features across cash application, dispute management, and dunning automation, contributing to ~35% reduction in cost-to-collect at the flagship enterprise account. - Ran discovery interviews with AR managers, collections analysts, and finance ops leads, with findings directly shaping 6 platform features shipped to production and adopted across multiple accounts. - Drove cross-functional alignment across engineering, QA, and client finance teams in a 19-ERP post-merger environment, unblocking data delays, integration gaps, and sign-off bottlenecks. - Shaped quarterly roadmap by converting recurring client pain points into configurable SaaS capabilities, reducing per-account bespoke engineering across the Collections Cloud platform.	
Product Owner · Intellect Design Arena	May 2024 – Jan 2025
- Owned product vision and backlog for digital customer onboarding, family banking, and loan origination, on a configurable, codeless digital banking platform. - Authored end-to-end PRDs covering workflow states, decision logic, exception paths, and integration handoffs for Retail, SME, and Corporate banking journeys across mobile and web. - Led discovery workshops with Tier-1 banking clients across global markets, validated assumptions, surfaced friction, and aligned product direction. - Drove delivery across UX, engineering, QA, and client implementation teams, held MVP scope, sequenced dependencies, and maintained velocity. - Contributed to platform roadmap by distinguishing configurable platform needs from client-specific requests, with capabilities licensed across multiple Tier-1 banking clients in multiple markets.	

- Conducted current state analysis of retail and corporate banking workflows, identified automation and digitisation opportunities, documented future-state process redesign, and contributed to BRD documentation for banking transformation initiatives.

Associate Product Manager · Etech Global Services

Dec 2020 – May 2022

- Built Customer 360 analytics capabilities integrating multi-touchpoint behavioural and transactional data, surfaced product friction patterns and supported data-driven prioritisation decisions across enterprise client accounts.
- Designed and ran VoC and journey analytics programs, closed-loop feedback mechanisms, drop-off analysis, and experience improvement prioritisation, contributing to sustained NPS improvement across commercial accounts.

Product Analyst · DIATOZ

Oct 2019 – Dec 2020

- Designed and built a BDD-based automated regression testing framework for a digital banking platform, covering onboarding, transaction, and servicing workflows with overnight scheduled runs and automated stakeholder reporting.

KEY PROJECTS**Post-Merger Invoice-to-Cash Transformation** *Fortune 500 Global OEM Distributor*

- Owned end-to-end product delivery for a post-merger O2C transformation spanning 300+ branches and 19 ERP instances, from current state assessment through BRD authoring, sprint governance, and production handover.
- Redesigned collections workflow architecture, dispute resolution, and cash application logic across a fragmented multi-entity AR environment with no consistent collections process across merged business units.
- Drove cross-functional delivery across product, engineering, QA, and client finance ops, aligning 19-ERP data flows to a single collections workflow without requiring ERP-level changes.
- Result: ~35% reduction in cost-to-collect and ~6-day DSO improvement against pre-transformation baseline.

Collections Cloud *HighRadius*

- Defined and shipped Customer Legal Entity Tagging, resolving ~23% AR misclassification across post-merger entity structures without ERP changes; adopted across multiple accounts.
- Delivered Project Account Receivables Decoupling, enabling granular sub-project aging visibility and targeted collections triggers for project-driven enterprise clients; extended beyond the originating account.
- Shipped Email Inbox 2.0, a redesigned collections analyst workflow with conversation threading, invoice linkage, and analyst assignment tracking, eliminating manual follow-up tracking outside the platform.
- Delivered Auto Promise-to-Pay, Auto Draft, and Auto Send, an automated collections communications cadence replacing manual outreach and standardising follow-up workflows across enterprise AR operations.

STP Onboarding & Loan Origination Journeys *Retail & SME Banking · Multi-channel · Intellect DEP*

- Designed end-to-end loan origination journeys across Retail and SME banking segments, covering application states, decision triggers, fallback logic, and integration handoffs across mobile and web channels.
- Defined STP-enabled onboarding architecture covering KYC, document capture, decisioning, and exception-state handling including fallback paths and operator intervention triggers, targeting high straight-through processing rates.
- Collaborated with engineering and business teams to operationalise configurable workflow orchestration within regulatory constraints across multiple banking markets.

CERTIFICATIONS

- Certified Scrum Product Owner (CSPO®), Scrum Alliance, 2026
- AI for Product Managers, Scrum Alliance, 2026 (Pursuing)
- Lean Six Sigma Black Belt, KPMG, 2026
- Product Management Essentials, Product Space, 2024

ACHIEVEMENTS

- National Finalist, Flipkart Wired Case Study Competition, 2022 (inter-B-school, national level)
- National Finalist, Hero MotoCorp Strategy Case Challenge, 2023 (inter-B-school, national level)
- Core Member, Constrat — Consulting & Strategy Group, XIMB; case preparation, workshops, and industry engagements
