

SAI KIRAN BISWAL

Product Manager · Enterprise SaaS & AI Workflow Automation · MBA, XIMB · CSPO®

Pune / Bengaluru • +91-8018136097 • saikiran.biswal@outlook.com • [linkedin.com/in/sai-kiran-biswal](https://www.linkedin.com/in/sai-kiran-biswal) • [PORTFOLIO](#)

PROFESSIONAL SUMMARY

Product Manager with 5+ years across B2B SaaS in finance automation, digital banking and CX platforms, and an MBA from XIMB. I own product scope end to end: discovery, PRDs, roadmap prioritization and release, including AI agent workflows with human-in-the-loop and fallback design, in multi-stakeholder enterprise environments.

SKILLS & EXPERTISE

Product : Product Discovery · PRDs & User Stories · Roadmap Prioritization · Backlog Grooming · UAT · Agile

AI Product: AI Agent Workflows · Human-in-the-Loop & Fallback Design · Automation Success Metrics · AI-Assisted PRD Workflows & Prototypes

Domain Workflows: Invoice-to-Cash Automation · Collections · Digital Banking (Onboarding, Channels, KYC) · Customer 360 & Journey Analytics

Commercial Solutioning: RFP Responses · Solution Architecture · Client Workshops · Solution Design

APIs & Integrations: REST · JSON · Functional Specification (FSD) Authoring · S2T Data Mapping · MuleSoft · Azure Service Bus

Delivery & Tools: Agile · CSPO® · Stakeholder Management · Release Readiness · JIRA · Confluence · Azure DevOps · SQL

PROFESSIONAL EXPERIENCE

Product Consultant, Collections Cloud, Solution Design & Product Alignment · HighRadius

Jun 2025 – Present

- Owned product scope for the **Auto Promise-to-Pay** and **Auto Draft** AI agents in enterprise Collections Cloud (Accounts Receivable), setting the autonomy boundary and escalation design so every unresolved case surfaces its reason and routes to a collections analyst; shipped at a **70% automation success rate**.
- Owned the workflow-redesign layer of a Fortune 500 post-merger invoice-to-cash transformation (**300+ branches**), making scope and sequencing calls across the redesign; program delivered **35% lower cost-to-collect** and a **6-day DSO improvement** against the pre-transformation baseline.
- Authored FSDs defining REST API endpoints, JSON payloads, S2T data mappings (full and delta loads for Customer Master and AR Activity) and error-remediation protocols across Microsoft Dynamics 365, Oracle Cloud AR and HighRadius via MuleSoft and Azure Service Bus.
- Led SIT and UAT validating multi-system workflows, approval state transitions for DG and HRC, credit hold and release triggers, and end-to-end API and SFTP transmissions across **19 ERP instances**.

Product Manager, Sales Automation · Metal Power Analytical

Feb 2025 – May 2025

- Shipped Salesforce inbound and outbound sales-pipeline automation to production, automating 5 lead-to-order stages into PRDs, user stories and CRM data-validation rules and removing manual handoffs from lead capture to order.
- Led data-automation work across CRM and sales data sources, defining data mapping, validation and reporting so pipeline analytics stayed accurate and actionable.

Product Owner, Digital Banking SaaS · Intellect Design Arena

May 2024 – Jan 2025

- Owned backlog and product scope for customer onboarding, retail banking and loan-origination workflows on the event-driven MACH.ai Digital Engagement Platform (iDEP) serving retail and corporate front and back office.
- Designed KYC and STP onboarding journeys: decisioning, exception states and fallback paths routing ambiguous cases to reviewers with context.
- Drove backlog and roadmap decisions across 2 concurrent retail banking transformation engagements, guiding delivery squads on scope and MVP trade-offs and making fit-gap calls that protected deal value and platform margin.

Business Consultant (Intern), Digital Banking Transformation · Tata Consultancy Services

Apr – Jun 2023

- Mapped current-state and future-state banking workflows and contributed BRD inputs for a retail and corporate banking transformation.

Senior Product Analyst, CX SaaS & Customer 360 · Etech Global Services

Dec 2020 – May 2022

- Built Customer 360 analytics to surface product-friction patterns and support prioritization across enterprise CX accounts.
- Designed VoC and journey-analytics programs to close feedback loops, analyze drop-offs and prioritize CX workflow improvements.

Product Analyst, Workflow Automation · DIATOA

Oct 2019 – Dec 2020

- Built BDD-based regression coverage for banking onboarding, transaction and servicing workflows with scheduled stakeholder reporting.

KEY PROJECTS

Auto PTP & Auto Draft AI agents · Collections Cloud

Post-Merger Invoice-to-Cash Transformation, Fortune 500 OEM Distributor · Collections Cloud

STP Onboarding & Digital and Assisted Channels' User Journeys, Retail & SME Banking · Intellect DEP

EDUCATION, CERTIFICATIONS & ACHIEVEMENTS

MBA, Business Management · Xavier Institute of Management Bhubaneswar (XIMB)

2022 – 2024

B.Tech · Veer Surendra Sai University of Technology (VSSUT), Burla
